

Foreword

Fungal Genetics Newsletter #43B contains abstracts from the 3rd European Conference on Fungal Genetics, held at Munster Germany march 27-30, 1996. The 6th Edition of the FGSC Catalog comprises FGN 43A. In the main body of the Newsletter are the usual wide range of articles and bibliographic updates for Neurospora and Aspergillus nidulans. As always, suggestions regarding the Newsletter are welcome at any time and should be directed to the Newsletter Editor, the FGSC Director and/or to the Fungal Genetics Policy Committee.

Members of the Editorial Board:

Peter J. Russell, Reed College, Portland

Thomas Adams, Texas A&M University, College Station, Texas

A. John Clutterbuck, Glasgow University

Stephen Free, SUNY Buffalo, New York

Martin L. Pall, Washington State University, Pullman, Washington

Alice Schroeder, Washington State University, Pullman, Washington

Claude Selitrennikoff, University of Colorado Health Sciences Center, Denver, Colorado

Eric U. Selker, University of Oregon, Eugene, Oregon

Carolyn Slayman, Yale University School of Medicine, New Haven, Connecticut

Alan Upshall, Zymogenetics, Seattle, Washington

Barbara Valent, DuPont Experimental Station, Wilmington, Delaware

Richard Weiss, UCLA, Los Angeles, California

Brett Tyler, University of California, Davis

Olen C. Yoder, Cornell University, Ithaca, New York

John Kinsey, Fungal Genetics Stock Center, ex officio

ad hoc reviewers

A.J.F. Griffiths, University of British Columbia

H. Branch Howe, Athens, Georgia

David Perkins, Stanford University

Members of the Fungal Genetics Policy Committee:

Greg May (Chair), Baylor College of Medicine

Brett Tyler (past chair), University of California, Davis

Lorna Casselton, University of London

Godeleine Faugeron, University of Paris

Michael Hynes, Univerisity of Melbourne
Regine Kahmann, University of Munich
George Marzluf, Ohio State University
Marc Orbach, University of Arizona
Miriam Zolan, Indiana University
John Kinsey, Fungal Genetics Stock Center, ex officio
Peter Russell, Reed College, ex officio
Dick Weiss (ex officio)

Editorial, publication and distribution costs supported by donations and subscriptions to the Fungal Genetics Newsletter and by grant BIR- 9222772 from the Biological Research Program, National Science Foundation.

FUNGAL GENETICS NEWSLETTER #44

FGN #44 will be published in the summer of 1997. Reviewing of manuscripts commences in January of the publication year so contributions should be made between 1st January and the submission deadline (see INSTRUCTIONS FOR CONTRIBUTORS below). The Newsletter is a suitable place for short research notes, methods notes, linkage data, information concerning new mutants, announcements of meetings, or of positions available et cetera. It is a policy not to accept an abstract or shorter version of a full-length paper which will be published soon in a regular journal. However, a more extensive description of techniques or mutants used in a regular paper would be appropriate for FGN. We particularly encourage you to use FGN to describe new techniques or methods. All manuscripts are reviewed but will not be returned to authors for minor editorial changes. Please make every effort to have your manuscript conform to the format used in FGN. The details of formats for "Mini Reviews", "One-Liners" and "Brief Notes" are as follows: "**Mini Reviews**" is a section in which one or two brief reviews of an area of research will be published. Potential contributors are encouraged to communicate an outline of their review before writing the manuscript. "**One-Liners**" is a section in which helpful hints, et cetera, can be communicated. Please communicate one or two sentence pieces of useful information at any time during the year. "**Brief Notes**" is a section in which a brief account of research observations can be made; typically only very preliminary research will have been done.
