## Prologue

*Timepiece, Student Center, Illinois Institute of Technology,  
Office for Metropolitan Architecture*

### Temporality

tem-po-ral-i-ty, [tem-puh-ral-i-tee] –noun, plural -ties.

1. The condition of being of, relating to, or limited by time
2. The condition of being bounded by time.\*

How does time become an element of design?

Designers have the ability to create architecture that reveals the condition of the present; but designers also may have the desire to transcend the immediate. Architects are able to expose properties of time through their process and in the manifestation of their ideas. Our goal is to characterize a spectrum of engagements with temporality in architecture.

Kyle Leiker and Corey Schneider
